Series spec sheet

RMTB

TRITIUM SIGN
Power Free - No AC
Suitable for Hazardous Applications/Locations
15 year Lifespan

The Stanpro RMTB series of self-luminous running man signs provide reliable signage for applications where typical signs cannot be employed. The RMTB series are completely non-electrical so they can be installed in any location, including glass entranceways/vestibules, greenhouses and outdoor applications. This also insures that the RMTB signs are non-sparking, making them ideal for explosion-proof locations. RMTB signs are not governed by the requirements of the C860 standard due to the non-electrical design of the light source.

FEATURES AND SPECIFICATIONS

- **Light source**
  – 15 year expected life
  – The tubes are lined with phosphor which glows green in color
  – The light output is unaffected by extremes temperature or moisture
  – Continuously illuminate at performance specifications for the rated duration
  – The brightness of the light sources used in the sign are an average of 120 microlamberts

- **Mechanical**
  – Tritium signs are supplied standard with a white, low profile thermoplastic frame
  – The frame secures the thermoplastic face and stencil and allows for simple wall mounting
  – Bracket for ceiling mounting included
  – The tritium is sealed within several silicate tubes fitted into the ABS thermoplastic housing
  – The light source requires no maintenance or service throughout the lifespan of the sign
  – Temperature from -30°C to +65°C

- **Compliances**
  – Running Man Multipurpose signs are compliant to the CAN/ULC-S572 standard
