VTL8-L

8' NEMA 4X, NSF VAPOR TIGHT

Optional Emergency Remote

A 8' luminaire ideal for a variety of industrial, commercial applications. Installed either indoors or outdoors, the VTL8-L provides superior light distribution. Intended for applications where moisture and/or dust may be present. Also appropriate for those applications that may require: washability/hose down, complete containment of the LEDs, the ability to withstand reduced temperatures and withstand moderate impact. Seals dust out.

FEATURES AND SPECIFICATIONS

Construction

- Lightweight, slim and durable polycarbonate construction makes the luminaire highly impact resistant
- The housing is sealed with a uniform gasket that blocks the ingress of moisture and dust and reinforced snap clips lock the luminaire together
- Comes standard with stainless steel latches

Mounting options

Stainless steel mounting hardware for ceiling or suspended mounting. V-hooks are also provided for suspension on chain or aviation cable mounting.

Lens

Polycarbonate frosted lens with LED diffusing pigment is impervious to rust or rot and is unaffected by extreme temperatures.

Technical specifications

Driver

- 120-347 V
- 0-10 V dimming driver. Dimming cables sold separately, see ordering guide.
- Operating temperature:
- -40°C to +40°C (-40°F to 104°F)

• Optional Emergency Lighting

Normally ON emergency remote vapor proof luminaire "Link"

- Consuming 11 W, 12-24 VDC
- 200 mA constant current
- Delivers 1645 3366 lumens in emergency mode
- Ease of maintenance when used with Stanpro emergency lighting battery units complete with auto test function
- Patent Pending

Please view the LINK specification section for more details on this technology

• Emergency Lighting Compliances

- CSA certified as a C22.2 C141-15 emergency lighting
- Meets ICES-005 requirements

• General Lighting Compliances

- Suitable for damp & wet locations
- Meets requirements of ICES-005
- UL1598, UL 8750
- cETLus certified
- NSF
- NEMA 4X
- IK10

COMPATIBLE DIMMERS 1

| Brand | Model |
|---------|-----------------|
| Leviton | DS710-10Z |
| Lutron | DVSTV-453P |
| Leviton | DD710-BDZ |
| Leviton | IP710-LFZ |
| Lutron | MAESTRO MS-Z101 |

¹ This table shows dimmers that have been tested and have demonstrated proper operation under normal conditions. Each installation being unique, various factors such as load, common neutrals or other electrical products on the circuit can, in certain instances, cause variance in system performance. Read and comply to the dimmer installation instructions. Consult dimming system manufacturer for additional support in operation. Some dimmers may require more than one product for stable operation. Stanpro recommends to use dimmers designed to work with LED products. Older dimmers designed for incandescent products may cause erratic operation.

Dimming range: 10 %-100 %

Data is based upon tests performed in a controlled environment. Actual performance can vary depending on operating conditions. All products are subject to change or may be discontinued any time without notice.

² Typical color temperature range: +/- 5 %.

³ Lumen values are derived from photometric testing. Initial lumens range: +/- 10 %.

⁴ Life hours are derived from IESNA LM-80-08 testing report and projected per IESNA TM-21-11 extrapolations.

² When selecting DIM1 option please also select cable option whether L6, L10, L6-BK or L10-BK.

³ Fixture functional in AC mode, when power goes off emergency bodine powers LED boards. One bodine per fixture ⁶ When selecting DL option, the fixture maintains wet location status, however

⁵ Emergency Backup only available for 120-277 V.

NEMA 4X and IP ratings are no longer applicable.

OCCUPANCY SENSORS

ON-OFF SENSORS

Detection - On at (Detection Area) % during (Hold Time) min. Off

| Part number | Position | Volts (V) | Technology | Height (ft) | Detection Area (%) | Hold time (min) | Daylight min level (lux) | Remote ¹ | Location ² (°C) |

DIMENSIONS

Data is based upon tests performed in a controlled environment. Actual performance can vary depending on operating conditions. All products are subject to change or may be discontinued any time without notice.

² Min and max ambient temperature of the fixture with the specific sensor. Please verify fixture temperature on the first page for compatibility with sensor.

LINK

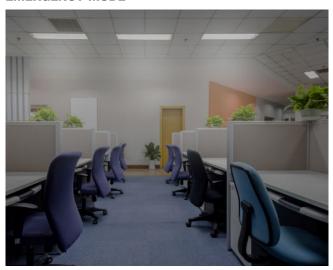

NORMALLY ON EMERGENCY REMOTE LUMINAIRE

This unit can be used with an emergency backup powered by either a 12 V or 24 V DC Stanpro battery unit, complete with or without auto test.

NORMAL MODE

EMERGENCY MODE

TYPICAL SPECIFICATION

Supply and install Stanpro "Link" ____FT, LED vapor tight, Model number: _____ remote normally on emergency luminaire, CSA C22.2 141-15 certified and meet the requirements prescribed by ICES-005. Normally on when AC is present and when connected to a Stanpro battery unit complete with or without auto test, the fixture shall act as an Emergency Lighting remote and consume 11W of DC power in V producing 1645 - 3366 Lumens in Emergency mode.

The remote normally on emergency luminaire shall be powered by a Stanpro emergency lighting battery unit as described herein and shown on the drawings. The Stanpro Auto Diagnostic micro-controller board shall supply the rated load for a minimum of a 1/2 hour to 87.5% of the rated battery voltage. The unit shall be rated 120V, 277V or 347V, 60 Hz and be CSA listed. The unit shall have an output of: ___V and ___W. The charge voltage factory set to \pm 1% tolerance. High efficiency, rapid recovery, precision control charging system shall be employed to promote long battery life and reduce the potential for grid corrosion. The charger shall provide a continuous high charge to recharge the battery, when the battery is at full capacity, the charger will shut-off. Periodically the charger shall provide a pulse of energy to keep the battery topped off. The pulse charger shall be precisely regulated and shall charge the battery in relation to its temperature, state or charge and input voltage fluctuations. The charger shall be current limited, temperature compensated, short-circuit proof and reverse polarity protected. The unit shall be furnished with an electronic lockout circuit, which will connect the battery when the AC circuit is activated, and an electronic brownout circuit, which will activate the emergency lights when utility power dips below 75% of nominal voltage. A low voltage battery protection circuit shall be provided and will disconnect the load when the battery reaches the end of discharge.

The automated testing performed by the Stanpro Auto-Test system has been designed to comply with all of the requirements of the National Fire Code. Every month a 5 minute discharge and diagnostic test checks the operational status of the unit. Every 12 months this test is extended to the full 30 minute, Code required duration. This insures that the battery charger is recharging the battery in accordance with Code requirements. The unit shall be Stanpro model: SL
