■ Miniaturized design

With its minimalist look, L3DOT series is available in four distinct lengths ranging from 2 cells to 10 cells. This linear recessed is small, but powerful delivering 160 to 170 lumens per individual cell.

■ Variety of finishes

Stanpro's L3DOT series is configurable according to any needs, available in four inner baffle finishes: white, black, gold or silver and so many more options. The combinations are endless to provide a customized decorative element.

■ High quality light

L3DOT series features an individual optical component for each cell to allow even light with a better beam control and diffusion. Its fixture provides superior light quality and a high color rendering of 90.

Imagine all you can do with the DOT Series
