

LED PUCK LIGHTS - LINE VOLTAGE (120 V)

LED Puck Lights with a gimbal feature to direct light where needed !

With a gimbal feature and a high quality housing, our 120 V line voltage LED Pucks will not only allow you to optimize the illumination of your workspace but also to accentuate decorative elements.

Versatile, these LED Pucks come in different finishes, are available individually or in kits of three units and, can be installed recessed or surface mount. For a quick and easy installation, they can be directly installed with the 120 V power cord or, for a more discreet installation, with the hardwire box for direct connection. No LED driver is required!

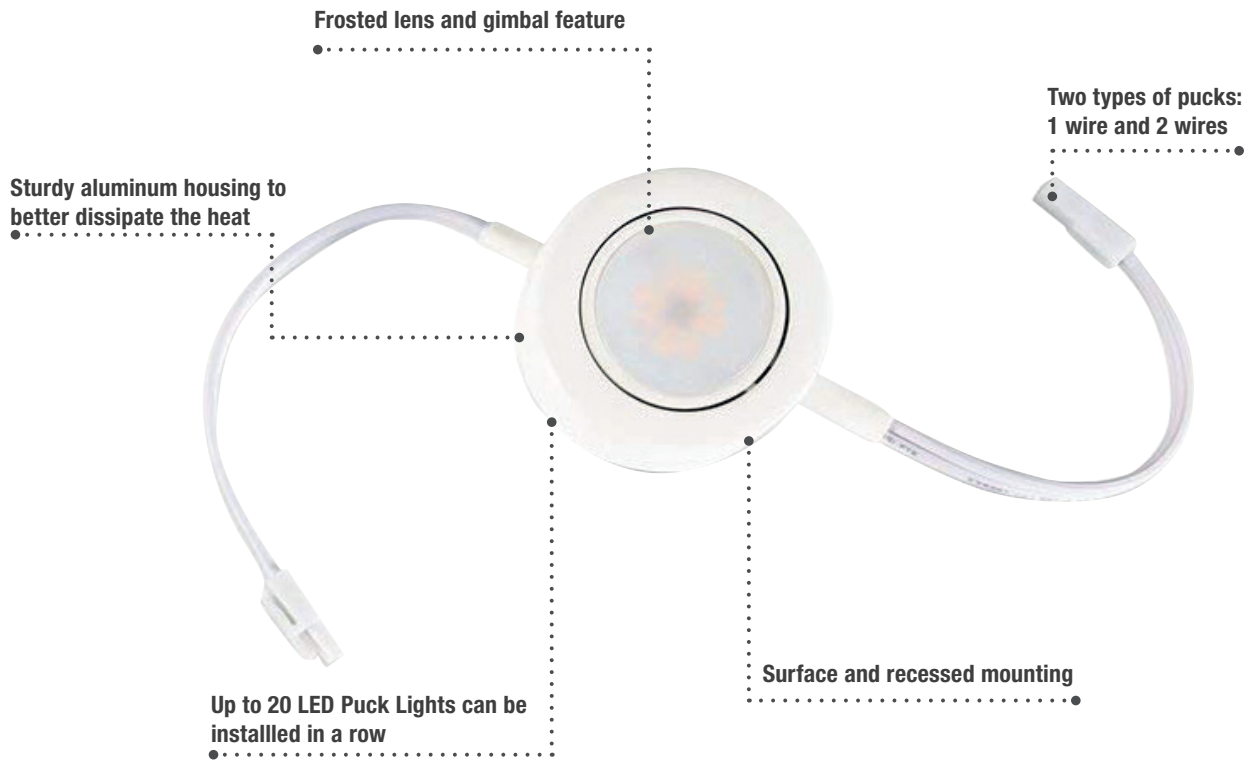

Features

- Color temperature, 3 000 K
- White and brushed nickel finish
- Available as single unit or in kit of three
- Full range of accessories available
- Dimmable
- 120 V
- CRI 90+

With a quick and easy installation, these LED Pucks can be used as task, accent or ambient lighting and are perfect for undercabinet or shelf applications.

LED PUCK LIGHTS - LINE VOLTAGE (120 V)
